EDUCATION

Vellore Institute Of Techonology   **Aug 2020 – Present**
Bachelor of Technology - CGPA -8.4

Narayana Junior Collage   **Jan 2018 – Mar 2020**
Board of Intermediate Education - Percentage - 96.6%

PROJECTS

SpaceX first stage landing Prediction – FrontEnd:Html,css | BackEnd:Flask,SVM,Python   **Nov 2022**
- Developed and implemented a robust Support Vector Machine (SVM) algorithm in machine learning to predict the success of SpaceX rocket booster landings during the first stage. The model achieved an impressive accuracy rate of 85%, showcasing its efficacy in accurately forecasting and enhancing the reliability of rocket landing predictions.

Espacito-Online Food Ordering Website – FrontEnd:Reactjs,Bootstrap | BackEnd:Node Js   **Present**
- Designed and implemented a dynamic food ordering website utilizing the MERN stack. Successfully deployed the project on Render to ensure optimal performance and scalability. Anticipating a user base of around 1,000 individuals, the platform offers a streamlined and intuitive interface for seamless food ordering experiences.

EchoVerse- Audio Converter – FrontEnd:Html,css | BackEnd:Flask,Python   **Nov 2023**
- Developed EchoVerse, a transformative project using Python. Designed and implemented a user-friendly front-end website, while the Flask backend enables users to convert text, PDFs, and images into audio. This innovative solution aims to enhance accessibility, particularly benefiting illiterate and visually impaired individuals.

TECHNICAL SKILLS

Programming Languages: Java,Python,JavaScript
Markup Languages: HTML,CSS
DataBases: MongoDb,MySQL
Developer Tools: VS Code, intellij
Technologies/Frameworks: Git/GitHub, ReactJS, NodeJS, ExpressJS,Bootstrap

CERTIFICATIONS

Full Stack Web Development from Internshala   **Present**

AWS Cloud Practitioner   **jun 2023**

EXTRACURRICULAR ACTIVITIES

Runner-ups at the College Shark Tank

Participated in a 3-day Web Development Bootcamp held by Codekaro

District-Level Wushu Competition Participant
